TECHNICAL DRAWING:

The **new programmable thermostat with touch screen and large display by GECA** can be installed on a recessed box with 2 or 3 modules.

Powered by two AAA batteries, that guarantee high autonomy, the device has a double functioning mode: the "summer-winter" function allows it to run heating systems and cooling systems.

JUST touch the surface of the display to activate the backlighting and show the control icons that make it possible to set the temperature controls and the various other commands that the product provides. The **ROMA** programmable thermostat has an anti-freeze program that the user can activate and modify to protect pipes from freezing even if the device is off.

The **new programmable thermostat with touch screen and large display by GECA** can be programmed and managed with a simple free smartphone application. It can be installed on a recessed box with 2 or 3 modules. Powered with 230V, it provides constantly updated information about the heating or cooling system, and allows the user to check its status and settings in a simple, intuitive way.

The **app**, which can be used to **manage more than one programmable thermostat at the same time from the same smartphone**, allows the user to turn the heating/cooling systems on and off, program their weekly functions, switch to manual mode, set the anti-freeze function and activate, if needed, threshold alarms for set temperatures.

| | |
|---------------------|--|
| Power Supply | 2 AAA batteries |
| Battery lifespan | About 24 months (in stand-by mode) |
| Dead battery alert | Yes, 2 thresholds |
| Programming | Every 30 minutes |
| Access control | Yes (with optional password) |
| Regulation fields | Winter: +5/+30°C Summer: +15/+35°C |
| Regulation interval | Winter: ±0.2°C Summer: ±0.2°C |
| Tolerance | Adjustable from ±0.2 to ±2°C |
| Contacts capacity | 230 VAC – 5A (Resistive load) |
| Installation | In a recessed box with 2 or 3 modules. |
| Colours | White and anthracite |

| | |
|------------------------------|--|
| Power Supply | 100 - 260Vac |
| Type of connection | Wi-Fi 2.4 GHz IEEE 802.11 b/g/n |
| Temperature threshold alarms | Yes, when temperatures are exceeded |
| Programming | Every 30 minutes |
| Access control | Yes (with optional password) |
| Regulation fields | Winter: +5/+30°C Summer: +15/+35°C |
| Regulation interval | Winter: ±0.2°C Summer: ±0.2°C |
| Tolerance | Adjustable from ±0.2 to ±2°C |
| Contacts capacity | 230 VAC – 5A (Resistive load) |
| Installation | In a recessed box with 2 or 3 modules. |
| Colours | White and anthracite |

Geca has developed an application for smartphones that can **interface simply and intuitively with your devices**. You can check the status and settings at any time, and change them as you like.
